

## Hydrogen Europe Charter

**By joining Hydrogen Europe, the members:**

- Support the European Green Deal.
- Support and sign up to the climate targets of the Paris Agreement and the subsequent European Climate Law.
- Recognise hydrogen as a net zero emission society enabler.
- Recognise hydrogen as an energy vector to enable the energy transition by replacing coal, oil and natural gas and by complementing renewable electricity.
- Support hydrogen as a clean energy carrier and feedstock to achieve the transition to net zero emission in the power, gas, heating and cooling, industry and transport sectors, enabling sectoral integration.
- Respect that hydrogen can be produced in many ways and support the acceleration of all zero-emission technologies with a priority on renewably produced hydrogen.
- Supports the establishment of a market for clean hydrogen as a commodity based on the principle of carbon content as new currency.
- Aim to establish the principle of a system- and cost-efficiency as a guiding principle of the future energy system, including stakeholders from the civil society, science, industry and public institutions.
- Aim to act together to enable the energy transition through hydrogen technologies and develop a strong European hydrogen industry.

**Hydrogen Europe is the European association representing the interest of the hydrogen industry and its stakeholders.**
